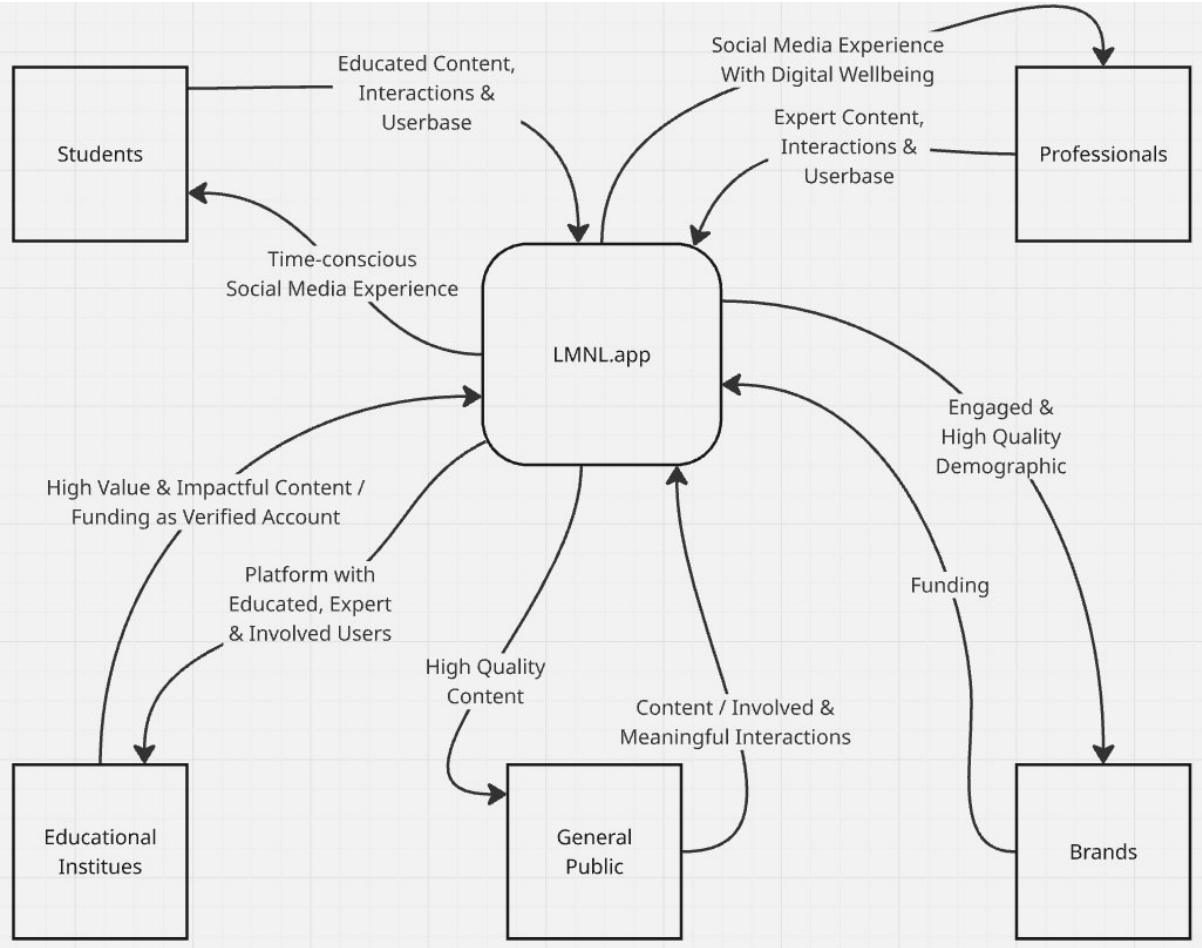
TABLE OF CONTENTS

1. BUSINESS CONTEXT DIAGRAM 3

2. REQUIREMENTS SCOPE STATEMENTS 4

3. HIGH LEVEL BUSINESS REQUIREMENTS SIGN-OFF 5

1. Business Context Diagram



Requirement Scope Area	Description
Content and limitations	The system must limit the number of daily posts, likes, and comments.
App availability	The app must be available on Android and iOS platforms.
User experience	The system must provide a predictable, capped content feed.
Hosting and database	The app must support locally hosted database and server.
Documentation	The system must include adequate documentation for future developers.
Verified accounts	Verified accounts that of educational institutes have a limit of 2 posts a day.
Monetization	The feed could contain only 1 post that originates from a paying brand as a clearly marked ad.

External Entity	Description
Student Users	Time-conscious social media users
Professionals	Working adults seeking digital wellbeing
Educational Institutes	Universities wanting to share impactful studies & breakthroughs
Brands	Brands wanting to advertise to more engaged demographic
General Public	Everyday social media users

Information Flows	Description
Content	Content uploaded by any type of student is saved in the database.
Interactions	All interactions by the user are saved in the database
Verified Account	Verified accounts require additional account information which is saved in the database.
Advertising	Additional information about the brand and advertiser is saved in the database, including amount and frequency of funding.

2. Requirements Scope Statements

HLR#	Description	Priority (H, M, L)
HLR-1	The system must limit user-generated posts to 5 per day for standard users.	High
HLR-2	The app must be available on both Android and iOS with feature parity.	High
HLR-3	The feed must be capped to prevent infinite scrolling and reduce user fatigue.	High
HLR-4	The system must store all content, interactions, and verified account data securely in the database.	High
HLR-5	The app must provide in-app documentation/help and technical developer documentation.	Medium
HLR-6	Verified educational accounts can publish max 2 posts per day.	High
HLR-7	The system must support monetization through one clearly marked sponsored post per day.	Medium
HLR-8	The app must ensure uptime availability of 99.5% through reliable hosting.	High
HLR-9	The app must enforce secure login/authentication for all users.	High
HLR-10	The app must comply with relevant data privacy standards (e.g., PIPEDA, GDPR).	High

3. High Level Business Requirements Sign-Off

The undersigned acknowledge their agreement with the contents of Version 0.2.1 of the High-Level *Requirements document for LMNL.app*.

Following approval of this document, requirements changes will be governed by the project's change management process, including impact analysis and appropriate reviews and approvals, under the general control of the Project Plan and according to company policy. Approved Change Request Documents, if present, will be attached to this Requirements Document as updates.

Name	Project Role and Functional Area	Date Signed
Samin Qureshi	*Database Engineer, Back-End Engineer, QA Analyst*	28/09/2025
Soman Ahmad	*Back-End Engineer, DevOps, QA Analyst*	28/09/2025
Talalovic Ababakar	*UI/UX Designer, QA Analyst*	28/09/2025
